

TILTH GROWS SEED!

This is what we're all about at Taeges! Our flexible tyne and vibrating tips give you excellent penetration.

**MORE EFFICIENT.
BETTER YIELD.
MORE CHOICE.
BETTER QUALITY.**

"No machinery survives on my farm unless its built like the proverbial outhouse, so it was a good trial ground for a Taege cultivator. I've done about 10,000ha – 12,000ha and it sure has passed the test. There hasn't been any cracks or breakages which is a good testament to the product because we go about 13kmh and there are plenty of rocks to contend with. I'm comparing the Taege cultivator equipped with Taege finger harrows with our previous cultivator with a crumbler and the Taege is a definite winner. The Taege also handles the trash a lot better".

ANDY STOKES

Taege Cultivator

- Available in 3m – 6m standard or custom build size options.
- Excellent contour following is achieved due to the pivot slots in the wings..
- Hydraulically controlled lifting on all four wheels giving you easy depth control with the ram spacers.
- Adjustable front draw bar angle for easy levelling – front to rear.
- Our Taege 6m folding tyre roller and harrows are an excellent addition to the cultivator package.
- Full complement of upgrades available to suit your individual requirements.

**Great value, great results –
you be the judge!**
