

TESTIMONIALS

Chris Daley, Fencetec Contracting in Southland

"It was time for a Taege. I needed a strong, fast, and long-lasting post driver to cope with the severe conditions we work in. In the fencing business for forty years, we have a good knowledge of what is required to get the job done. We needed to be able to fit a few of our own customisations. It had to be safe, fast and very strong and we bought our first

Taege Contractor Post Driver because of the strong reputation it has for just that. The best feature is the hydraulic spike turner with the benefit of being faster and a whole lot safer. We will be replacing our other brand of post driver and it will be with a Taege".

I bought my first Taege post driver on the reputation they have, and I've had trouble-free running for seven years, never putting a welder to it. The new one I've just purchased is great with the extras. The hydraulic spike turner is brilliant for speed and safety and the end shift makes it a very easy one-man operation.

It's a very well made local product that does the job well and what it was built for" Mike Warwick.

SPECIFICATIONS

STANDARD UNIT

| | FARMER | SUPERSTRIKER | CONTRACTOR |
|--------------|---------|--------------|------------|
| Spools | 1 | 4 | 4 |
| Top Link | No | 250mm | 300mm |

CANTERBURY New Zealand

With a reputation of being strong and long lasting, the Taege range of post drivers is built with you, the end user, in mind so that you get more bang for your buck. The things to look for in a post driver are: safety, strength, durability, ease and speed of use, and of course great value for money. There's no need to look any further than a Taege. With prices ranging from \$6857 + GST to \$40,000, there are plenty of options to choose from to suit your requirements.

Contractor End Shift

Contractor 600mm Side Hydraulic Legs

Optional 200mm - 600mm sliding side shift. Allows the feet to stay still and eliminates sideways force trying to move the tractor sideways. Essential when a rock spike is used.

Optional End Shift (170mm - 200mm) Seen first on a Taege, this turns your fencing into a one person operation. Eliminates jumping in and out of the tractor seat if not in the right position.

Optional Rock Spike with Hydraulic retraction. 75 - 90mm. Again first seen on a Taege.

Heavy Monkey 500lb (230 kg) to 1000lb (460kg) It's a lot faster and easier to drop a heavy monkey from a short distance than a light one over a big distance.

Spike Turner

Superstriker 300mm Side

Optional Hydraulic Spike Turner - Moves the spike around into position hydraulically. Great safety feature by keeping operator away from monkey at all times. Allows for much faster operation in many ways.

Optional Hydraulic Folding Mast - 4.0m and 4.6m eliminates those expensive and embarrassing moments of catching overhead lines. Lowers centre of gravity.

Optional Side Mount - 900mm of travel allows for plenty of movement. Double linkage mounts allowing for left or right fitting.

Hydraulic Independent Legs - A luxury extra until you have it, then it becomes something you wouldn't do without. Speeds up process, gives more angle, assists in pulling out posts.

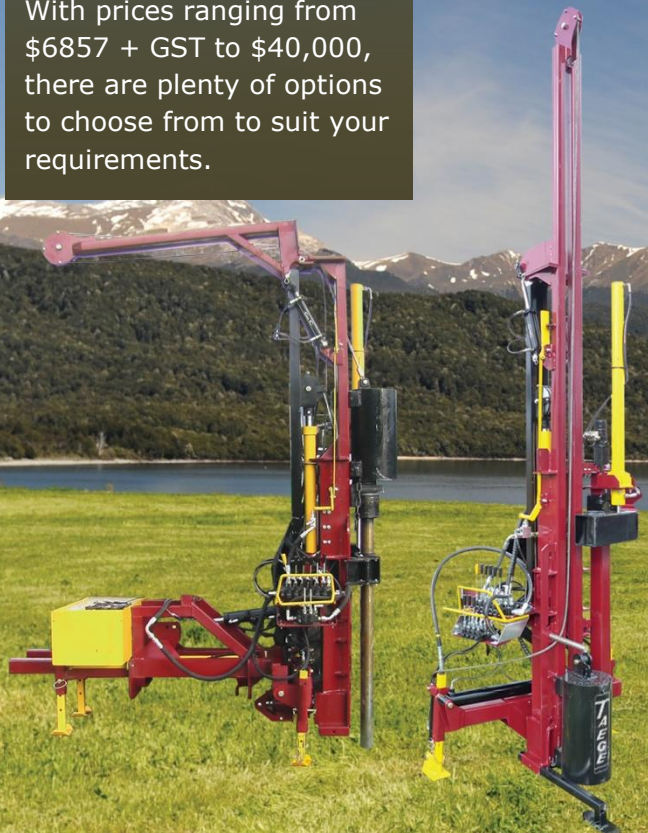

Great Resale Value - How often do you see a 2nd hand Taege Post Driver for sale? You have to be quick.
